BEAN BAG LOUNGER ASSEMBLY & FILLING GUIDE

PACKAGE CONTENTS:

1 x Outer Cover (Boucle Top and Sides, Vegan Leather Base)

1 x Inner Lining

INSTRUCTIONS:

1. Unzip the outer cover at the base of the Bean Bag Lounger, and pull out the internal zippered opening.
2. Funnel the beans through the opening and into the outer cover to your desired fullness. For best results, we recommend using 3-4 x 100L bags of beans.
3. Take the inner lining piece and join it to the internal zippered opening using the zipper attachment.
N.B. To avoid any bean spillage, please ensure the casing is fully zipped on all sides.
4. Push the inner lining inside the outer cover, moulding and fluffing the beans to fill all corners of the lounger. Close the outer cover zipper, flip your bean bag to the correct orientation.

If disassembly is required, unzip the outer cover, and pull out the inner lining piece, making sure to keep both outer and inner pieces securely zippered together. Tip or shake the beans out of the outer cover cavity and into the lining bag. Once all beans have been emptied, unzip the outer cover from the lining, and secure the beans in the lining bag using the cords attached.
