

CANVAS ART PRINTS

STRETCHED CANVAS

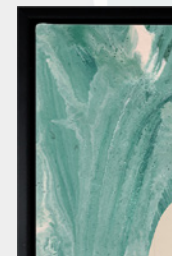

Urban Road's stretched canvas art prints are professionally printed on premium polycotton artist canvas, using fade resistant latex printing methods and then stretched and gallery wrapped. This means the image is stretched around a 36mm frame to create a seamless, museum quality finish. All stretched and box framed art prints arrive ready to hang.

SHADOW BOX FRAMES

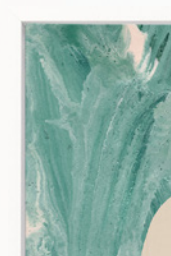

We also offer the option to add a shadow box frame to your Urban Road canvas art print. A little different from a traditional framed print, the canvas sits within the box frame with a 5mm gap, creating a sophisticated shadow effect between the frame and the canvas. Our box frames are 15mm thick, and 50mm deep, and add approximately 50mm to the length and height of the listed canvas size.
