

# CANVAS ART PRINTS

## STRETCHED CANVAS

Urban Road's stretched canvas art prints are professionally printed on premium polycotton artist canvas, using latex printing methods and then stretched and gallery wrapped. This means the image is stretched around a 36mm frame to create a seamless, museum quality finish. All stretched and box framed art prints arrive ready to hang.

## SHADOW BOX FRAMES

We also offer the option to add a shadow box frame to your Urban Road canvas art print. The canvas sits within the frame, 10mm from the edge, creating a shadow between the canvas and the frame. The depth of the frame is 50mm.

## ROLLED ART PRINT

Our new product provides you with the ability to display your Urban Road artwork with your own personal flair. Prints are made to order and professionally printed using a premium printer on durable, museum-quality, matte coated polycotton canvas. Your print will arrive wrapped and rolled in a protective tube with an Urban Road certificate of authenticity, ready to be professionally framed.
